**CONFIDENTIALITY:** The nature of the health care industry and the state and federal privacy laws require all employees, volunteers, and students to maintain a high level of confidentiality with respect to all information of medical or business nature concerning patients, residents, doctors or employees. **Under no circumstances will such information be discussed with any unauthorized person(s) either outside or inside of the health care facility.** To engage in discussions of confidential information is not only a breach of confidence and a lack of concern for others, but may also involve you in legal proceedings

**INFECTION CONTROL:** Proper hand washing helps to prevent the spread of infections from one person to another. Hand washing products, which contain a special antibacterial agent, are available in the rest rooms and work areas. Hands should be rinsed well using friction to remove residual soap. You may not to enter any room designated "Isolation". If there is a potential that you will have direct contact with a patient's blood or other body fluids, you **must** wear protective apparel. Please consult with an on-site staff member for further instructions.
